

DELTA COMPLETE™ is a proprietary combination Drift Reduction Adjuvant (DRA) and Volatility Reduction Agent (VRA) that is specifically formulated for over-the-top dicamba chemistries. It provides drift reduction, volatility reduction, humectancy, defoam, and water conditioning—all in one formulation. With a Molybdenum inclusion to support nitrogen uptake, Delta Complete provides the best agronomic and most convenient offering.

FEATURES

- One jug solution for DRA/VRA
- Non-AMS water conditioner and defoam system
- Molybdenum inclusion

GROWER BENEFITS

- Most convenient offering to ensure approved DRA and VRA as required by EPA
- Water conditioning and defoam package provide agronomic benefits with the convenience of a one-jug solution
- Proprietary formulation with Molybdenum inclusion assists with Nitrogen uptake
